PUBLIC NOTICE
For
Air Quality Operating Permit & Acid Rain Permit
Williams Four Corners, LLC - Milagro Cogeneration and Gas Plant

Williams Four Corners, LLC at 188 County Road 4900, Bloomfield, NM 87413 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Milagro Cogeneration and Gas Plant. The owner of this plant is Williams Four Corners, LLC. The exact location of the facility is at latitude 36 deg**,** 44 min, 9.4 sec and longitude -107 deg**,** 56 min, 30.1 sec. To aid in locating this facility, the approximate location is 3 miles NE of Bloomfield, NM, 87413 in San Juan County. This application file has been assigned an Operating Permit Number P101-R2, an Acid Rain Permit P101-AR3, and TEMPO Agency Interest ID No. 1277.

Previously, the facility received an air quality construction permit and is in operation. The main purpose of the facility is to receive, compress, dehydrate, and process pipeline quality natural gas as well as produce electricity for commercial sale.

This operating permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action incorporates modifications permitted in NSR 0859-M7 and 0859-M7R1, including:

- Adding Start-up, Shutdown, and Maintenance emissions from the turbines and other facility equipment.
- Updating HAP emissions from the boilers, HRSG duct burners, dehydrator reboilers, amine contactors and turbines.
- Updating emissions from fugitive leaks and the existing condensate storage tank.
- Adding malfunction emissions.
- Constructing two condensate storage tanks (T29 &T30 @ 200 gal each).
- Correcting engine serial numbers.

The emissions, as established in NSR Permit 0859-M7, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit – P101-R1M1. Emissions are expressed in tons per year (tpy). Nitrogen Oxides (NOx) at 543.9 tpy (no change); Carbon Monoxide (CO) at 588.7 tpy (no change); Volatile Organic Compounds (VOC) at 130.2 tpy (21.0); Total Suspended Particulates at 73.3 tpy (no change); Particulate Matter 10 microns or less (PM_{10}) at 73.3 tpy (no change); and Particulate Matter 2.5 microns or less ($PM_{2.5}$) at 73.3 tpy (no change). Greenhouse gas (CO_2e) emissions remain over 75,000 tpy.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 7, 33, 61, 70, 71, 72, 73, 74, 77, 82, and 84; 40 CFR 50; 40 CFR 60 Subparts A, Db, and GG; 40 CFR 63 Subparts A, HH, ZZZZ, DDDDD, and CCCCCC; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before November 22, 2014. This source is a major source according to 20.2.74 NMAC, PSD.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P101-R2 and Acid Rain Permit P101-AR3 by contacting Melinda Owens at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Melinda Owens at 505-476-4341.
